

The KNC is a clear vinyl non residue void seal. The security message is a transparent message, which can further be highlighted using an Ultra Violet light source. Text/logo is usually printed in U.V. (invisible) ink. However sequential numbering if required would have to be in a "light" white/yellow etc." colour. The aggressive adhesive backing makes the KNC suitable for most porous and non porous surfaces. We also have a "KC" security seal should you require a VOID seal that DOES leave an adhesive residue when removed

- Supplied in reels on a backing liner and perforated between each for ease of use
- Customised design text and or logo with sequential numbering.
- Standard size is 85mm x 25mm though other sizes are available on request.
- Also available with a dual/duplicate number tab.
