

Originally developed for use on Rubber (vehicle tyres) this paper/aluminum foil material combined with an extremely aggressive adhesive is perfect for sticking to difficult, rough, uneven surfaces. It is favored in the aviation industry for sealing difficult surfaces from passenger baggage to toilet inspection panels. The seal incorporates the security petal cuts, which makes removal, once applied almost impossible. The MRN is also designed not to leave unwanted adhesive residue on the surface of the sealed item. Supplied in many differing sizes and shapes. It is also effective on porous and non porous surfaces alike, such as, wooden crates,

- Supplied in reels with backing liner perforated between each seal.
- Double interlocking security cuts.
- Customised design text or logo with optional sequential numbering.
- Four standard sizes, but any shape or size can be supplied.
- One stock size.

Product Code.	Type MRN Security Seal
General description.	General purpose security seal with tamper evident petal security cuts
Facestock material.	86 g/m ²
Facestock colour.	White
Face Print.	Stock design or printed to customers instruction.
Type of backing adhesive.	Rubber based (117) high tack adhesive.
Temperature range of backing adhesive.	Minus 20°C to Plus 70° C
Recommended minimum application temperature.	Minus 0°C
Recommended shelf life	1 year when stored under 22° C and humidity of 22%
Adhesive tack performance.	Initial tack - 1240 N/m
Hazardous	No known hazardous features or ingredients other than personal allergies

MRN2 High-Tack Security Seal
