The KTXT security packing tape has been introduced to satisfy the increasing demand for a high quality, low cost packaging/parcel tape. The tape carries a standard VOID/OPENED security message and a plain unbranded surface. The benefit of a plain (un-personalised) tape is that is tends not draw attention to the fact that the contents of the package or parcel being sealed may be of high value. The KTXT can be used on fibreboard, plastic and some woods, and, itself. Any attempt to remove or lift the tape will result in the VOID/OPENED message being clearly displayed

TSA compliant for CCSP.

Suitable for use with standard tape dispenser
